Keeping pace with today's rapid and progressive growth of modern business and industry are the everyday problems of manpower, equipment and space required for maintaining active and inactive business records.

Recognizing these problems and needs, this catalog is offered as a comprehensive guide to greater efficiency and economy through the effective utilization of both filing equipment and space.

Your local office equipment dealer is ready to demonstrate the economical line of DOLIN specialized equipment and to offer his experience in helping you plan an effective records keeping program.

## DOLIN MOBILE STORAGE SYSTEMS

### MORE RECORDS IN LESS SPACE!

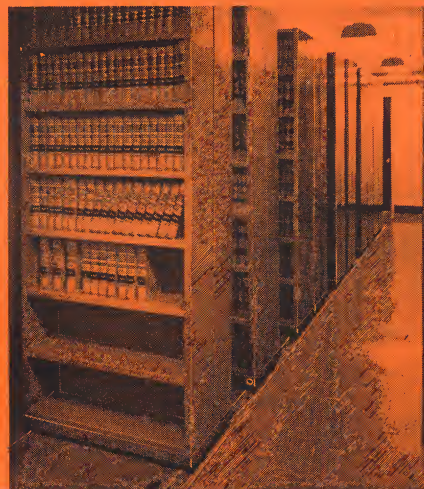

For several years DOLIN has pioneered the use of a unique system offering the maximum possible utilization of floor space. The DOLIN MOBILE STORAGE SYSTEM is being widely used in active file areas, record centers, vaults, data processing departments and for general supply and storage areas in both the office and factory.

Through a specialized technique that eliminates a large percentage of the aisle space normally required in every area, it is actually possible to increase filing and storage capacities from 30-100% within the limits of original existing space. When increasing the filing or storage capacity is not a problem, MOBILE STORAGE can be used to condense existing facilities, freeing valuable space for other important functions.

DOLIN MOBILE STORAGE has proven, through wide acceptance, to be one of the most practical methods towards increasing efficiency and economy within an organization. All the DOLIN equipment shown in this catalog can be readily adapted to a MOBILE STORAGE SYSTEM. Ask your dealer or write to MOBILE STORAGE DIVISION of DOLIN METAL PRODUCTS, INC. for illustrated catalog showing how MOBILE STORAGE can benefit your organization.

# **DOLIN** ✦ "G300" SERIES STEEL TRANSFER FILES SPACE SAVERS

**DOLIN STEEL TRANSFER FILES  
MEAN NO REPLACEMENTS  
... ONLY ADDITIONS  
AS YOUR VOLUME GROWS**

**EQUIPPED WITH  
NYLON GLIDES  
FOR QUIET, EASY GLIDE  
DRAWER ACTION**

**FULL 24 FILING INCHES**

## **ONLY STEEL PROVIDES THE "EXTRAS" THAT ASSURE ECONOMY AND EFFICIENCY**

**EXTRA** long life and carefree service. DOLIN steel transfer files outlast short-lived cardboard files, never need replacements, only additions as the volume grows. Remember too, DOLIN steel files always have a market value as used equipment.

**EXTRA** easy on your help. Each DOLIN steel drawer operates easily on either nylon glides, ball bearings or rollers. No pulling, straining, no periodical lubrication or juggling of cartons.

**EXTRA** advantage of low cost storage space. The minimum outside dimension design and interlocking arrangement allows maximum utilization of storage area. The rigid steel construction permits placement in almost any atmosphere, basements, etc.

**EXTRA** flame resistance—records kept in DOLIN steel transfer files are less susceptible to flash fire damage.

**EXTRA** records protection from damaging dust. DOLIN steel transfer files need no air conditioning or periodic interior vacuuming or cleaning.

**EXTRA** records protection from damaging moisture, soaking from sprinkler systems, etc.

**EXTRA** records protection against damaging vermin and rodents. All steel construction requires no vermin attracting adhesives or cardboard.

This series of steel transfer files will complete your inactive records storage program by providing the low cost protection and ease of operation that assures long range efficiency. The "G 300" nylon glide files, with their minimum outside dimension design and special drop handle which permits greater aisle widths, provide the fullest possible utilization of your storage area. Designed to easily lock together into ceiling high batteries, they make space-wasting shelving, paper boxes or short-lived corrugated files costly, impractical and ineffective. The self-lubricating nylon glides attached to both the drawer and file case, provide continually quiet, easy glide action of the drawers when heavily loaded. Each drawer provides a full 24 inches of filing space.

This combination of expert engineering, nylon glides and functional design, makes an ideal file for years and years of care-free inactive records storage.

## FOR EFFICIENT SPACE UTILIZATION AND RECORDS STORAGE ECONOMY

### EASILY AND SAFELY INTERLOCKED

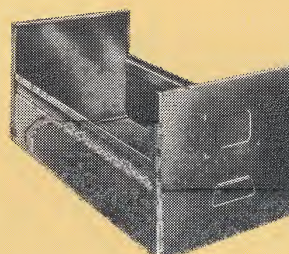

No special clips, "gimmicks" or other fingernail-breaking devices are needed. One simple motion engages strong back clip. Standard nuts and bolts, supplied free, offer the most positive and effective vertical and horizontal interlocking method — in strict accordance with Federal Government Specifications. Proven by thousands of installations.

### RIGID ALL WELDED CONSTRUCTION

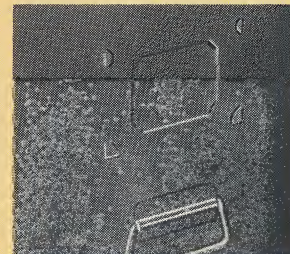

Heavy 24 gauge steel electrically welded throughout, with reinforced 1/8" thick steel front prevents binding or sagging. Heavy 16 gauge bottom tracks with wear-resistant nylon glides for smooth, level drawer operation. Positive safety drawer stop prevents drawers from accidentally pulling out. Drawers can be removed by lifting up and out.

### QUIET, EASY GLIDING STURDY DRAWERS

Heavy 22 gauge steel drawer front with nylon glides at bottom rear for smooth drawer movement. Reinforced channels at sides and bottom for extra drawer rigidity. Full height drawer back engages positive drawer stop. Special drop handle permits narrower aisle space. Other type handles available.

### DUAL VISION CARD HOLDER

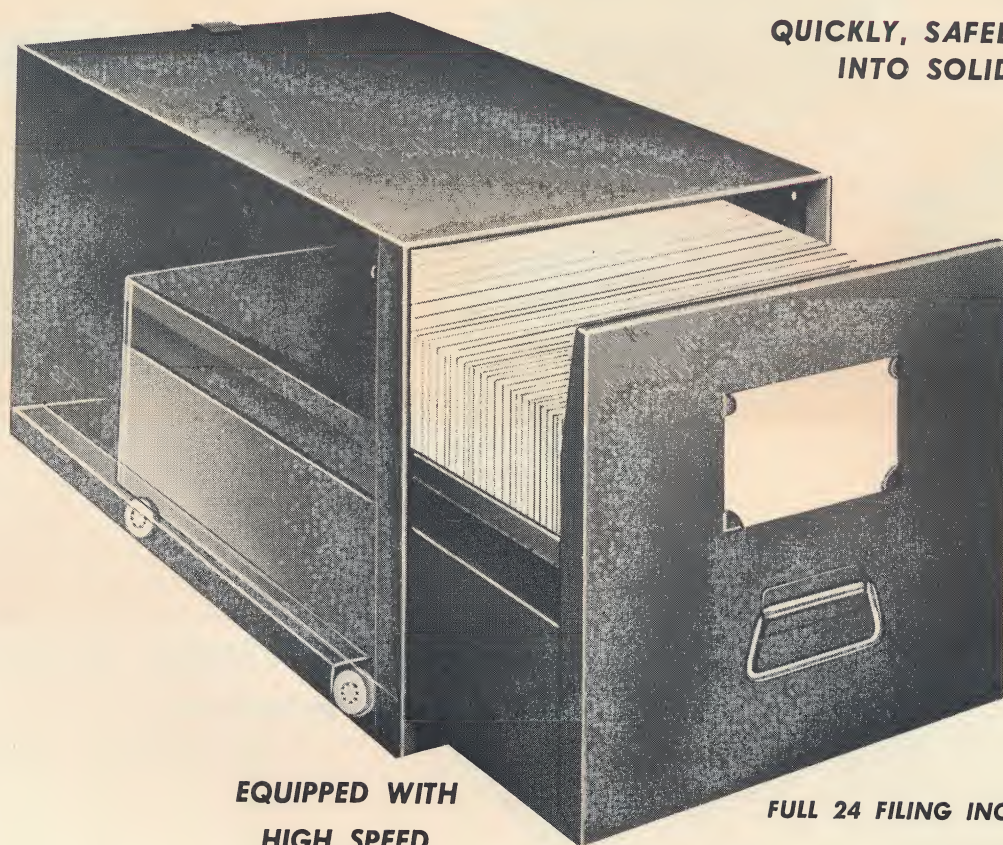

Your choice of either 2x3 or 3x5 identification cards is possible without any mechanical changes. Now any file, regardless of stacked height, can be easily identified. (Available only on files having a minimum inside height of 5".)

# **DOLIN** ★ "R400" SERIES STEEL TRANSFER FILES

## **SPACE SAVERS**

**QUICKLY, SAFELY INTERLOCKED  
INTO SOLID BATTERIES**

**EQUIPPED WITH  
HIGH SPEED  
BALL-BEARING ROLLERS  
FOR FINGERTIP DRAWER  
OPERATION**

**FULL 24 FILING INCHES**

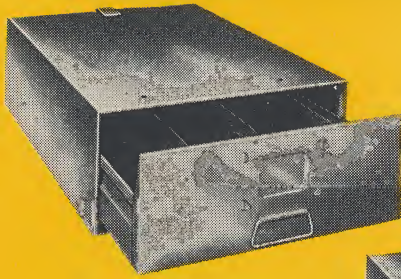

The "R400" series steel transfer files are designed for records centers where the degree of reference demands an easier drawer operation than usually required in transfer files. Here are really smooth-rolling drawers made possible by the addition of four high speed ball-bearing rollers. No periodic lubrication is needed. Important, too, is the minimum outside dimension design and special drop handle (permitting greater aisle clearance) which permits the fullest possible utilization of the storage area. They easily lock together (in strict accordance with Federal Govt. specifications) into ceiling high batteries without using any special clips, tools or "gimmicks."

DOLIN files are made of heavy gauge furniture steel with reinforced  $\frac{1}{8}$ " thick iron front to prevent binding or sagging. Full 24" drawers have reinforced channeling at sides and bottom and a positive drawer stop. Special "DUAL-VISION" card holder on most sizes permits the use of either 2 x 3" or 3 x 5" identification cards.

## DOLIN ENGINEERED IN STEEL, FOR SAFE, DEPENDABLE RECORDS STORAGE

#### EASILY AND SAFELY INTERLOCKED

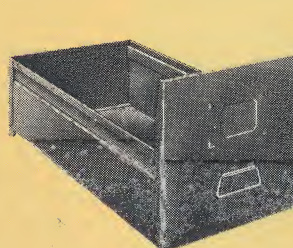

No special clips, "gimmicks" or other fingernail-breaking devices are needed. One simple motion engages strong back clip. Standard nuts and bolts, supplied free, offer the most positive and effective vertical and horizontal interlocking method—in strict accordance with Federal Government Specifications. Proven by thousands of installations.

#### RIGID ALL WELDED CONSTRUCTION

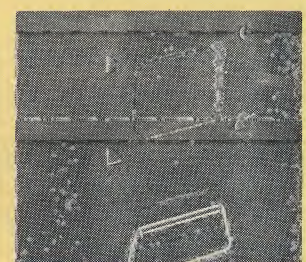

Heavy 24 gauge steel electrically welded throughout, with reinforced 1/8" thick steel front to prevent binding or sagging. Heavy 16 gauge roller channel tracks plus ball-bearing rollers for smooth, level drawer operation. Positive safety drawer stop prevents drawers from accidentally pulling out. Drawers can be removed by lifting up and out.

#### SMOOTH ROLLING STURDY DRAWERS

Heavy 22 gauge steel drawer front with ball-bearing rollers at bottom rear, plus positive drawer stop assures smooth, safe and effortless drawer movement. Reinforced channelled sides and bottom for extra drawer rigidity. Special drop handle permits narrower aisles. Other type handles available.

#### DUAL VISION CARD HOLDER

Your choice of either 2x3 or 3x5 identification cards is possible without any mechanical changes. Now any file, regardless of stacked height, can be easily identified. (Available only on files having a minimum inside height of 5".)

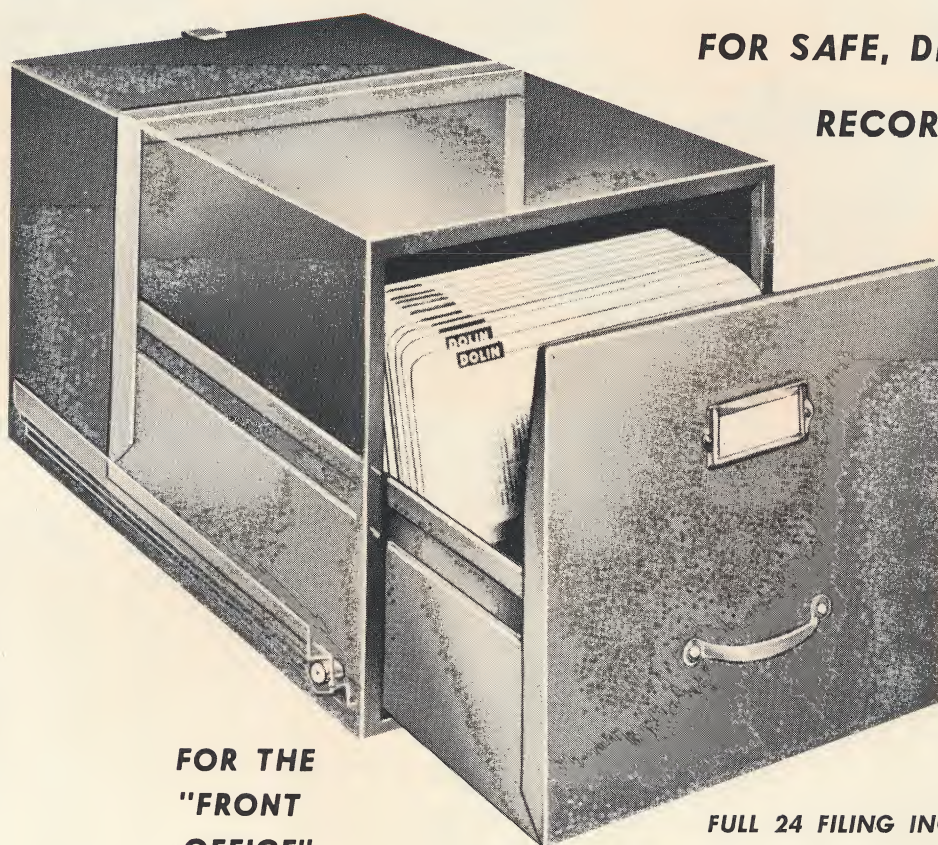

# **DOLIN** ✦ "500" SERIES STEEL TRANSFER FILES

**DOLIN ENGINEERED IN STEEL**

**FOR SAFE, DEPENDABLE**

**RECORDS STORAGE**

**FOR THE  
"FRONT  
OFFICE"  
LOOK**

**FULL 24 FILING INCHES**

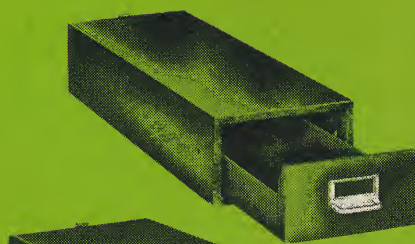

- **ROLLERS FOR EASY ACTION**
- **SHOULDER FRONT**
- **SAFE, EASY INTERLOCKING**
- **FULL 24" FILING SPACE**
- **BRASS PLATED HARDWARE**
- **HEAVY GAUGE STEEL, BAKED ENAMEL FINISH**
- **ECONOMICAL, LIFETIME STORAGE**

Every required feature for safe, dependable semi-active record keeping is found in the design of the economical "500" series all steel transfer files. The combination of brass plated hardware, wide shoulder front, steel construction and handsome long-lasting finish, makes this popular file ideally suited for front office use. Most files have steel rollers for smoother drawer action. All DOLIN files lock together safely and easily. No special clips, "gimmicks" or other fingernail-breaking devices are needed. One simple motion engages strong back clip. Standard nuts and bolts, supplied free, offer the most positive and effective vertical and horizontal interlocking arrangement — in strict accordance with Federal Government specifications and proven by thousands of installations.

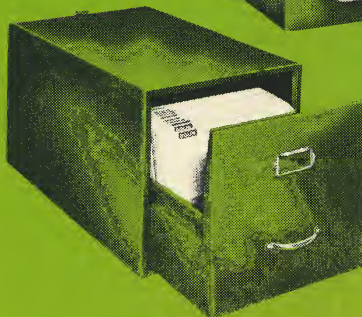

The expert construction of heavy gauge, all-welded steel offers the protection extras only steel provides. Dolin steel files are flame resistant, moistureproof, dustproof and verminproof. No rodent attracting adhesives are needed. No costly maintenance, interior dusting, vacuuming or periodic lubrication is required. Your records are always safe and clean. An installation of DOLIN steel files means no replacements of short-lived corrugated files — only additions, as your records volume grows.

# **DOLIN** ♦ **DOUBLE-DUTY RECORDS STORAGE FILE NO. 65**

**DOLIN**  
**DOUBLE-DUTY**

RECORDS STORAGE FILE NO. 65

- **ONE STANDARD SIZE LOW COST FILE FOR BOTH LETTER AND LEGAL RECORDS**
- **RECORDS STORAGE ECONOMY AND SYSTEM FLEXIBILITY**
- **IDEAL FOR LARGE OR SMALL INSTALLATIONS**

**QUICKLY, SAFELY INTERLOCKED INTO SOLID BATTERIES**

**1**

**STURDY, ALL STEEL CASE**

**FOR ADDED RECORD PROTECTION AND LONG LIFE**

with **2** **HEAVY TEST CORRUGATED COMBINATION LETTER-LEGAL TRAYS**  
**SET UP, READY FOR USE**

These new No. 65 files combine records storage economy with system flexibility for large or small records storage areas. Each DOUBLE-DUTY file features one sturdy *all steel* case with two heavy-test corrugated record trays. These double trays will hold *both letter or legal* size records (partitions can be added for other record sizes, checks, cards, etc.). This permits *standardization of one size file* for both record sizes, eliminating the problem of determining separate file requirements and greatly simplifying layout of storage areas.

The easy to handle 15 x 12 x 10" record trays hold 30" of letter or 24" of legal files. When storing letter size files the additional 6" *filing bonus* saves the cost of one letter file for every 4 DOUBLE-DUTY files used and reduces required floor space by 20 to 30%.

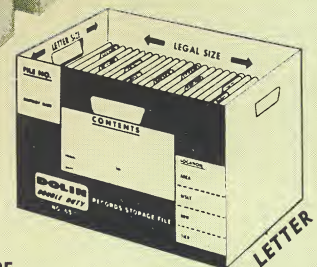

DOUBLE-DUTY files, with their set-up, ready for use record trays, eliminate 95% of

installation time and cost. The sturdy steel cases interlock in seconds to any height and width, permitting *full use of all the storage area*. No special stacking clips, tools, etc., are needed.

Since trays can be replaced at a low cost, it becomes practical to destroy original tray together with its entire contents when the retention period is complete. If desired, record trays can be replaced by standard legal size nylon glide steel drawers. Separate tray covers are available when using trays to transfer records to the records center and if trays are to be stored on shelving.

The low cost for original as well as expansion requirements, the increased file capacity and versatility of use, makes standardization with Dolin DOUBLE-DUTY files a sound and practical approach to records storage.

## FEATURES

**INTERLOCKING IN A JIFFY** — sturdy steel cases stack to any height or width for full use of all storage space — no special stacking clips or tools needed — eliminates 95% of installation costs.

**READY FOR YOUR RECORDS** — two trays set up in the steel case, no K.D. headaches or assembly required — large imprinted tray labels for quick identification — file number, contents and destruction date at a glance, no additional special labels are needed.

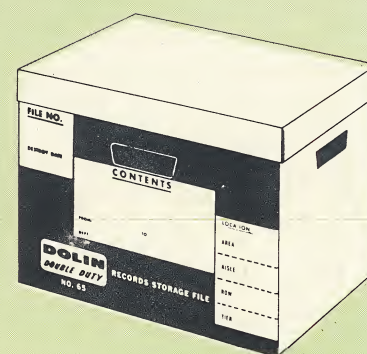

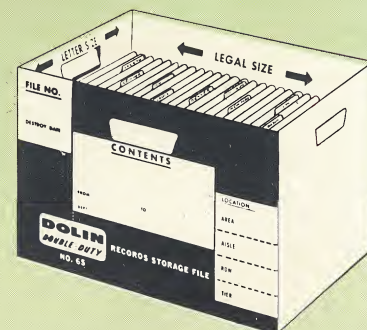

**STEEL DRAWERS** — add a standard legal size, nylon glide steel drawer in place of corrugated trays at any time — use steel drawers for your more active records.

**EASY TO HANDLE** — small size trays provide a convenient load — both trays easily accessible from a 30" aisle — references and filing are easy — no hard to pull, full depth corrugated drawers — tray replacements at low cost — dust flap tray front makes dust free closure between tray and case — records are always safe and clean.

**LESS FLOOR LOAD** — elimination of steel drawers reduces weight by 7 pounds per file — when floor load is a problem, you can add more files than would normally be possible.

**CONVENIENT RECORDS TRANSFER** — add covers (optional) and use same trays for transferring records to the storage area — saves time and cost of using other separate shipping containers — loaded trays go directly into cases without additional handling.

**MORE RECORDS IN LESS SPACE** — store about 30% more files as compared to typical shelving and box systems — you get 30" of letter size files, a 6" filing bonus that saves the cost of one letter file for every 4 DOUBLE-DUTY files used.

### **DOLIN "G300" SERIES SPACE SAVER DESIGN WITH NYLON GLIDES**

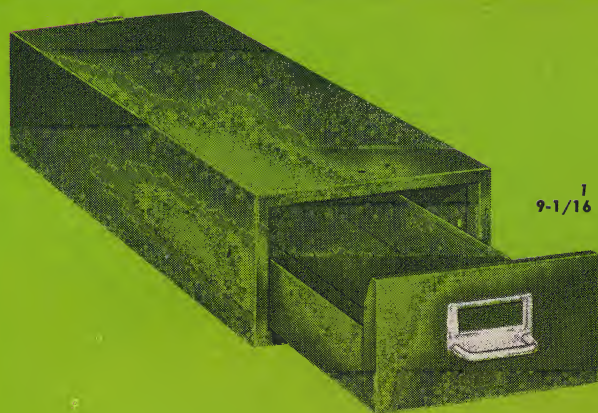

NO. G3732  
2 DRAWER TAB FILE  
16-11/16 w. x 4-3/8 h. x 24-1/4 d.

No. G3736  
6 DRAWER TAB FILE  
16-11/16 w. x 12-7/8 h. x 24-1/8 d.

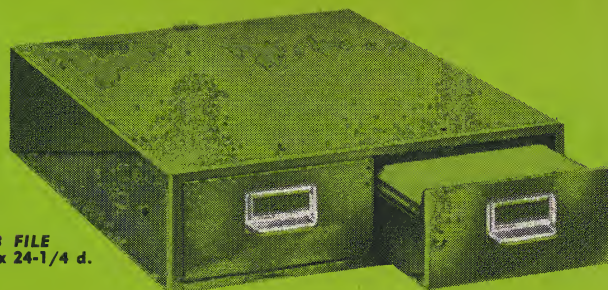

AVAILABLE WITH COMPRESSOR FOLLOWER BLOCK

For real economy and efficiency, build your tab dept. around these low cost 6 drawer and 2 drawer tab card files. Equipped with self-lubricating, wear-resistive nylon glides attached to both drawers and file case, these "G300" nylon glide files assure quiet, easy glide action of loaded drawers. Minimum outside dimension design and drop handle permits full use of file area. Both 6 drawer and 2 drawer files stack safely together in seconds without the use of special locking clips or tools. Handle on drawer back makes carrying easy—drawers are interchangeable, too!

### **DOLIN FAMOUS "500" SERIES . . . FOR "THE FRONT OFFICE" LOOK**

NO. 573

AVAILABLE WITH COMPRESSOR FOLLOWER BLOCK (HEIGHT INCREASES 3/8")

Millions of these "500" series steel transfer files are in daily use. They have set a standard for safe, dependable, and economical records storage. The combination of brass plated hardware, sturdy shoulder front, reinforced steel construction and handsome long-lasting finish, makes this popular file ideally suited for tab room use. Loaded drawers operate easily. All files lock together in the same easy, approved manner as the companion "G300" series files.

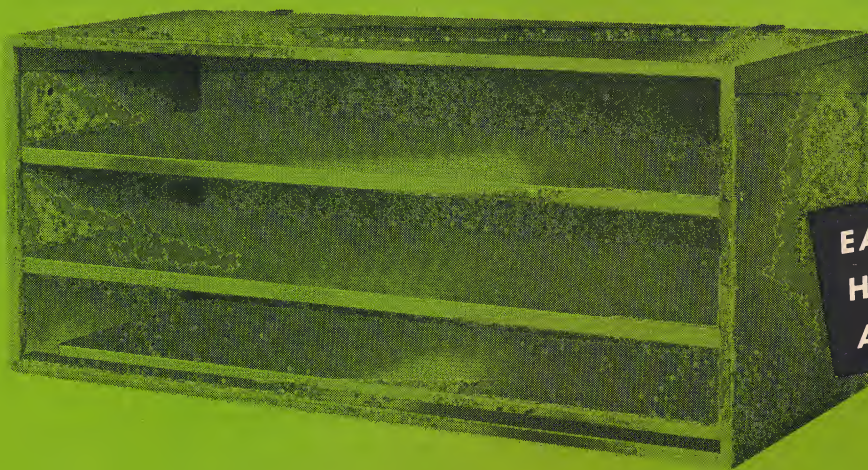

**KEEP 30-100% MORE TAB CARDS IN LESS SPACE  
WITH DOLIN MOBILE STORAGE SYSTEMS**

# **DOLIN** ✦ "TAB-STOR"—CARD STORAGE UNITS

HOLDS 12 TAB CARD BOXES

EACH BOX ON A SHELF  
HANDLE ONLY THE BOX NEEDED  
ADD AS YOU GO

FOR THE TAB ROOM

- **IMMEDIATE ACCESSIBILITY** to each tab card box is now possible with these DOLIN TAB-STOR steel units that hold 12 card boxes in both the 2,000 and 3,000 unit sizes. Each box is on a sturdy shelf and protrudes for quick picking.
- **EASY ON THE HELP** . . . laborious juggling and handling of needless boxes from cartons or from widely spaced shelving is eliminated — less chance of dropping and damaging vital cards. *Handle only the box needed and save time!*
- **ORDERLY STORAGE** becomes easy with a DOLIN TAB-STOR installation.
- **LOW COST PER BOX** . . . compared with other types of 6 or 8 box capacity units, TAB-STOR costs less per box — larger size means even less installation time.
- **EASY EXPANSIONS** . . . buy only the units needed — *add more* as the volume grows. Modifications are easily made — installation time is practically eliminated.
- **FLEXIBILITY** . . . DOLIN TAB-STOR units interlock in a jiffy without any special clips or tools — build them to the height and width needed for efficient operation — ideal as room dividers and work counters!
- **STURDY — LONG LASTING** . . . all steel design will give years of satisfactory service and protection of cards — constructed of 22 gauge steel throughout, reinforced with a triple-bend shoulder front — finished in gray or green baked enamel.

# DOLIN ★ NO. 710 CHECK & UTILITY CABINET

**HOLDS 33,000 CHECKS**

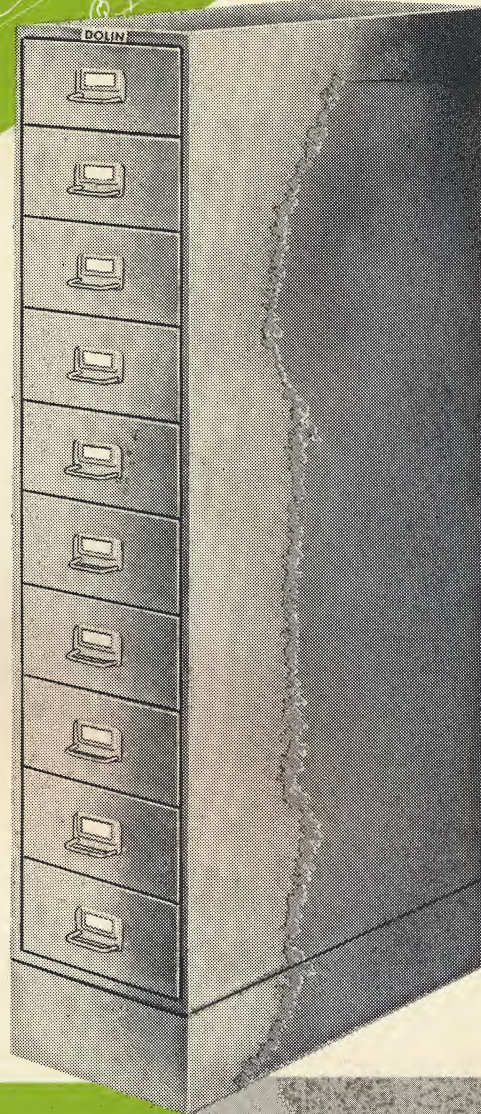

**ECONOMICAL, PRACTICAL STORAGE**

The No. 710 is a 10 drawer, all steel inexpensive cabinet that will house between 31,000 and 33,000 checks. This non-suspension cabinet is sturdily constructed of heavy gauge furniture steel with doubly reinforced corners and electrically welded throughout. Each drawer is furnished with a brass plated handle and card holder at front and a strong, welded handle at the rear for easy carrying. The entire cabinet is handsomely finished in a hard baked Gray or Green enamel finish. These files may be easily interlocked side-to-side and top-to-bottom where large installations are required.

While primarily designed for efficient check filing, there are many other forms and uses for this cabinet. Hundreds of small parts may be conveniently stored in the 10 drawers. Comparison will prove the No. 710 to be one of the most economical and versatile cabinets available today.

Optional equipment includes the No. 1710 base to raise the file to 52" high, steel barlocks for securely locking all drawers and white finish for hospital use.

**PERFECT FOR USE IN:**

OFFICES

SCHOOLS

FACTORIES

CHURCHES

WAREHOUSES

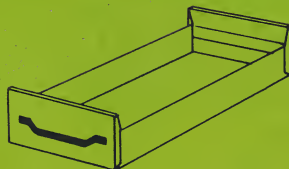

HOMES

STORES

CAMPS

**HOLDS HUNDREDS  
OF SMALL ITEMS**

**EXTRA REAR HANDLE** on all drawers makes it easy to carry drawers around when loaded with checks or small items.

# **DOLIN**

## **BUILD-UP \***

## **SHELF FILES**

### **ECONOMICAL FILING DESIGNED FOR GROWTH**

DOLIN Shelf Files are functionally designed to provide all the popular advantages of shelf filing at an economical cost. The two basic units, 1 shelf and 2 shelf files in letter and legal sizes, allows flexible planning. They quickly and safely stack together to the desired height and width eliminating costly installation time. Future re-arrangement of files is just as simple and time saving too.

#### **★ PROVIDES MORE FILES IN LESS SPACE AT LESS COST**

#### **★ SAVES 40-60% OF YOUR VALUABLE SPACE**

DOLIN shelf filing actually provides more filing inches per square foot of floor space than standard drawer files. One 8-shelf high unit provides 280 filing inches in 3 sq. ft. of floor space. Two 4-drawer files require 5.75 sq. ft. of floor space and provides only 208 filing inches! Shelf files require only 30" of aisle space for complete access while file drawers require aisles of from 36-60" just for drawer clearance.

#### **★ 35% FASTER FILING AND FINDING**

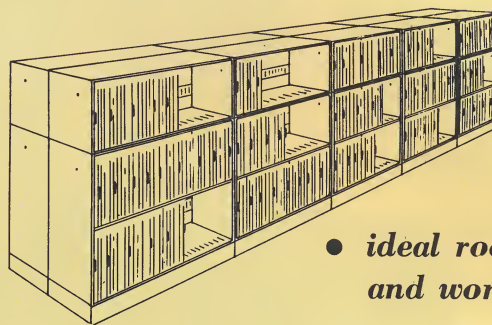

With DOLIN shelf files the file clerk has complete access to 6 or 7 shelves. Each unit has 35 filing inches clearly visible and accessible. A greater concentration of files in less space saves walking time—no time is wasted opening and closing drawers. Waiting time is cut since more than one clerk at a time can file from any one unit.

#### **★ COSTS 40-70% LESS THAN CONVENTIONAL FILE DRAWERS**

DOLIN shelf files eliminate the cost of expensive drawer assemblies. Basic construction is simpler, saving eventual repair bills. You save, too, because you need less shelf files than file drawers for an equal amount of records. Floor space savings alone often pay for the equipment in a short period of time. Since file clerks readily handle more records from less space, personnel savings often result.

#### **★ COSTS 20-40% LESS THAN OTHER SHELF FILE UNITS**

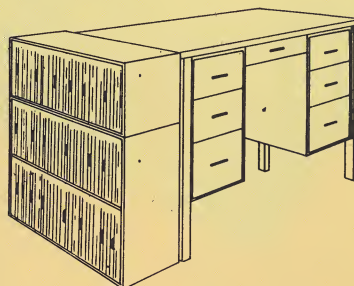

Compare—DOLIN's build-up shelf files provide the same functional utility as other more expensive shelf file units at less cost. No additional end finishing panels, top sections, etc. are required. Fully assembled 1 and 2 shelf units stack together in just minutes, saving considerable erection or dismantling time over other types of knocked-down shelf files. Remember too, with build-up units you need buy only the amount of files you presently need.

- *ideal room dividers and work counters*

- *use all your space . . . around doors, windows, etc.*

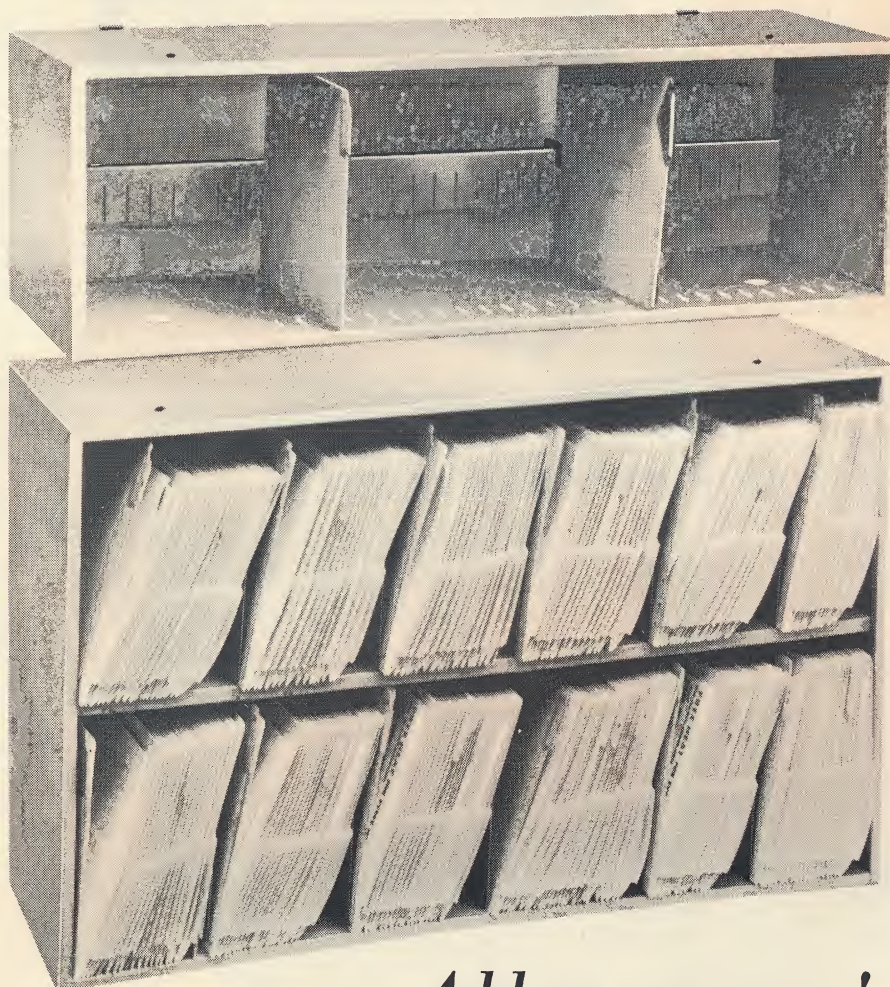

- *beside desks*

**\* completely assembled, 1 piece**  
**closed units ready to stack together**  
**— no installation problems, delays or costs!**

✦ *from the carton to filing in minutes!*

*Add as you grow!*

**PLAN FOR THE FUTURE WITH DOLIN SHELF FILES**

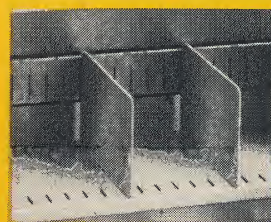

**THE VERSATILE, PRACTICAL FILING SYSTEM**

**FOR  
ACTIVE, SEMI-ACTIVE  
AND INACTIVE RECORDS**

DOLIN shelf files are expertly constructed of heavy 20 gauge steel, electrically welded into one sturdy unit. Reinforced welded brackets under front corners and wide shoulder fronts add extra rigidity. Shelves have reinforced sections welded underneath to prevent sagging under heavy loads. Slotted back bar and shelves hold sturdy removable steel dividers adjustable on 1" centers. Back bar permits use of index guides with locking hooks to prevent their accidental removal. Units interlock quickly and safely. Locking hooks welded at top rear engage backs of units. Nuts and bolts supplied for interlocking fronts and side to side. DOLIN shelf files are handsomely finished in office gray or green baked enamel. Other colors are available.

Slotted back bar enables use of locking hook type index guides and prevents their accidental removal during filing.

Removable steel dividers slip easily into slots on 1" centers. Dividers act as file folder supports. The use of additional dividers will make the handling of folders quicker and easier.

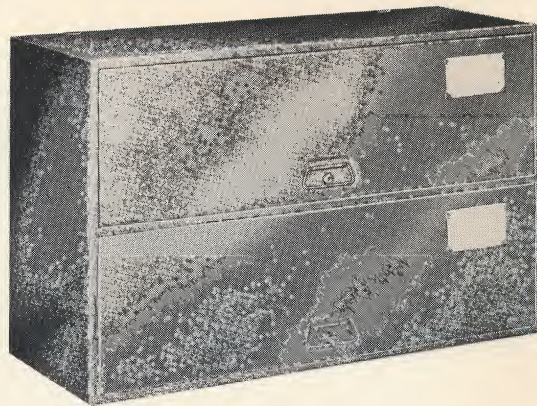

DOLIN shelf files quickly and safely interlock to any height and width saving considerable installation costs. Welded locking hooks at top and nuts and bolts for side to side and front locking. It takes just minutes to stack an 8-shelf unit.

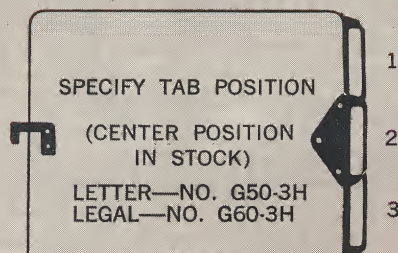

**DOLIN****BUILD-UP****SHELF FILES****WITH DOORS**

- FOR CLEANER RECORDS
- FOR ADDED SECURITY
- FOR NEATER FILES

For filing areas where dust is a problem, where extra neatness is important and for added records security, DOLIN shelf files are available with steel doors that recede out of the way, into the top of each shelf. Open doors in the morning and close them when the day's filing is done. Door units are 2" deeper than open type shelf files permitting file folders to become fully recessed from shelf front. Because of their special design, door units must be so specified and factory installed. They are not interchangeable with open type shelf files.

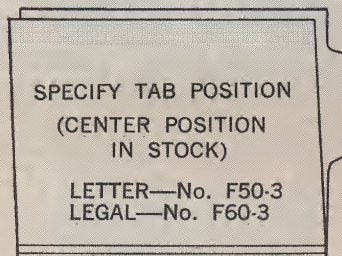

### ◆ SHELF FILING ACCESSORIES

#### GUIDES

Heavy 25 pt. pressboard guides with 1/8 cut black metal index tabs. Blank inserts with clear plastic index protectors included. Metal locking hook prevents accidental guide removal when shelves are fully loaded.

# DOLIN STACK SHELVES

*\* from carton to storage in minutes . . .*

- **STACK THEM—USE THEM!** From the carton to storage in minutes with Dolin's new "STACK-SHELVES," the easy way to add storage facilities.
- **NO INSTALLATION PROBLEMS, DELAYS OR COSTS!** Easy-to-handle 1 piece, closed 1 or 2 shelf units interlock together—only 6 nuts and bolts will assemble a 7 or 8 shelf high unit in just minutes—it is just as simple to dismantle, re-arrange or move units, too! (Compare with \$4 to \$6 per unit to erect or dismantle conventional nut and bolt steel shelving.)
- **PRACTICAL — VERSATILE — NEAT!** Stack them around doors, under windows, beside desks and machines—make work counters and room dividers—build into solid rows. Allows flexible planning and good house-keeping.
- **EASY TO EXPAND, ECONOMICAL TOO!** Buy only the shelves you need now—add sections as your requirements grow—lower initial purchase cost.
- **STURDY — RIGID — EASY TO HANDLE!** Units are welded into 1 compact sturdy unit with full sides and backs. Shoulder front construction adds rigidity and gives neat front office look without the usual unsightly punched angle posts. Reinforced welded channel under each shelf—easy to handle (1 shelf—20 lbs., 2 shelf—32 lbs.)
- **AVAILABLE WITH DOORS**—for dust protection, neatness and material security, STACK-SHELVES are available with receding doors. These units are 2" deeper than open type STACK-SHELVES and are factory installed. Locks are optional.

STACK-SHELVES ARE INTERCHANGEABLE

\*DIVIDER INSERTS AVAILABLE FOR  
 4 POPULAR TAPE REEL SIZES

1 $\frac{1}{16}$ ", 1 $\frac{1}{8}$ ", 1 $\frac{3}{8}$ ", 2" (12" DIAM.)

Dolin "Tape-Stor" Units are designed to provide safe, economical storage for active and inactive data tapes. Build up modular units allows flexible planning and maximum utilization of data storage areas. Units stack safely together in minutes to any height or width and can be re-arranged just as readily. Ideal as counters, room dividers, work stations, beside desks and in full storage batteries.

FINISH: GRAY BAKED ENAMEL

PACKED 1 PER CARTON

For operations where mobility is needed, the standard "Tape-Stor" units are available with heavy duty caster bases. Available as a factory installed item only.

**OPTIONAL EQUIPMENT**  
 3" HIGH STEEL SANITARY BASES  
 3" HIGH STEEL BASES WITH LEVELLING SCREWS

Each of the 2 basic sizes, 34" and 26 $\frac{1}{2}$ " wide, are available with divider inserts for 4 popular tape reel containers. Divider inserts can be removed and replaced in the event future changes are made in reel dimensions.

"Tape-Stor" units are sturdily constructed of heavy gauge steel with wide shoulder fronts for extra rigidity and neatness. Metal label holders welded the full shelf width for identification of reels.

## MOBILE TAPE STORAGE SYSTEM

When adapted to data tape storage, Dolin Mobile Storage System permits the use of more actual data storage equipment than is possible with any other method.
